## NE4-NO Electrochemical Nitrogen monoxide (NO) Gas Sensor

Nemoto Sensor  
Engineering Co., Ltd.  
4-10-9, Takaido-higashi,  
Suginami-ku, Tokyo,  
JAPAN

### General Description

The NE4-NO is a new electrochemical gas sensor with 3 electrodes for the detection of Nitrogen Monoxide gas (NO) in a variety of gas detection applications. Exhibiting high performance with long-term stability, this compact (20.4mm dia) sensor is suitable for portable Gas Detection Instruments or Fixed Gas Detection heads alike.

Nemoto's porous electrode technology enables accurate gas detection with high sensitivity. The mechanical design of the sensor gives optimum gas diffusion characteristics, and the hermetically sealed enclosure prevents costly electrolyte leakage.

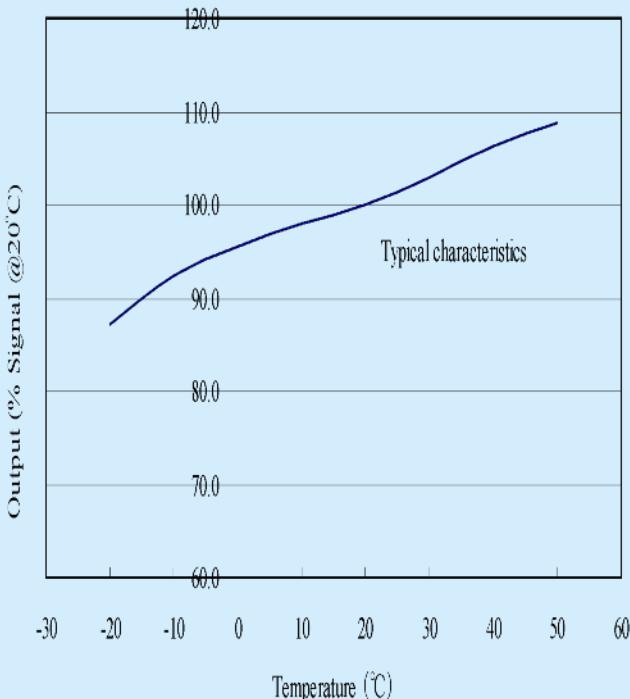

### Specifications:

|                              |                              |
|------------------------------|------------------------------|
| Detectable Gas               | Nitrogen Monoxide (NO)       |
| Detection Range              | 0-250 ppm                    |
| Maximum overload             | 1000 ppm                     |
| Output Current               | 400 +/- 80 nA/ppm            |
| Reproducibility (same day)   | +/- 2%                       |
| Zero in clean air            | < +/- 2 ppm equivalent       |
| <b>Long term drift:</b>      |                              |
| Zero                         | < +/- 2 ppm / Month          |
| Span                         | < 2% Signal / Month          |
| Response time (T 90%)        | < 40 seconds                 |
| Temperature drift (zero)     | < +/- 4 ppm (-20°C to +40°C) |
| Expected lifetime            | > 2 years                    |
| Temperature Range:           | -20°C to +50°C               |
| Humidity range (constant)    | 15-90% RH                    |
| Humidity range intermittent) | 0-99% RH                     |
| Pressure                     | 0.9 - 1.1 atm                |
| Recommended load resistor    | 10 Ω                         |
| Bias voltage                 | 300mV                        |
| Maximum storage time         | 6 months                     |

Test data on drift, poisoning, temperature performance, linearity are available on the Characterisation Document.

### Temperature response

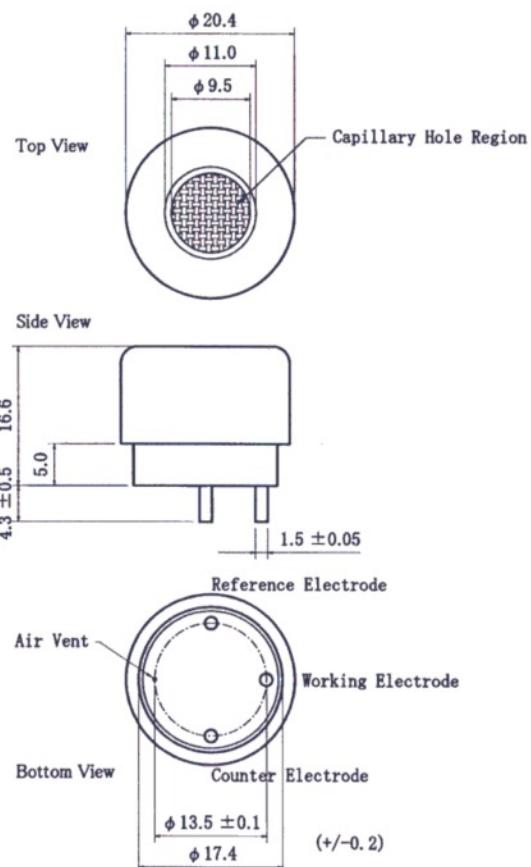

Nemoto has a policy of continuous development and improvement of its products. As such the specification for the device outlined in the data sheet may be changed without notice

ne4-no.ppp, issue 3, Dec 2012

## Dimensions:

## Typical Cross-Sensitivities:

| Gas               | Test Gas Used<br>(ppm in Air) | Test result<br>(ppm equivalent) | % Cross-sensitivity |
|-------------------|-------------------------------|---------------------------------|---------------------|
| Nitric oxide      | 100                           | 100                             | 100                 |
| Hydrogen sulphide | 20                            | <20                             | <100                |
| Hydrogen          | 500                           | 0                               | 0                   |
| Methane           | 5000                          | 0                               | 0                   |
| Carbon dioxide    | 5000                          | 0                               | 0                   |
| Sulphur dioxide   | 25                            | 0                               | 0                   |
| Ammonia           | 20                            | 0                               | 0                   |
| Nitrogen dioxide  | 10                            | <1                              | <1                  |
| Carbon Monoxide   | 100                           | <-1                             | <-1                 |
| Ethanol           | 100                           | <-7                             | <-7                 |
| Ethylene          | 1000                          | 0                               | 0                   |
| Chlorine          | 1                             | 0                               | 0                   |

Test data on drift, temperature performance, linearity etc are available on the Characterisation Document.
