## M/A-COM Technology Solutions / June 2010 Product Selection Guide

This Product Selection Guide contains information about our standard products. It is intended to assist in the selection of products to ensure availability, ease of use, and optimal performance.

These products represent 60 years of innovation in design and manufacturing. Detailed specifications for our standard parts can be found quickly on our Website at [macomtech.com](http://macomtech.com) by typing the part number into the Search by Part Number box. We provide product samples, test boards and applications support.

## About M/A-COM Technology Solutions

### Partner of Choice

A leader in the RF and microwave industry for nearly 60 years, M/A-COM Technology Solutions (M/A-COM Tech) has earned a global reputation as the partner of choice in applications for RF, microwave and millimeter wave technologies. Not only do we offer one of the industry's broadest range of solutions available today, but with our ongoing commitment to R&D, we continue to drive tomorrow's innovations.

Our technology and expertise extend across a broad range of solutions for the wireless communications, broadband, and aerospace and defense markets. M/A-COM Tech products are utilized around the world in some of the most challenging applications, including: CATV and broadcast, point-to-point radios and infrastructure, aerospace and defense, automotive, test and measurement, WLAN, WiMAX, RFID, and others.

### RF and Microwave Capabilities

M/A-COM Tech is one of the only vertically-integrated, non-captive RF and microwave suppliers in the industry. We're uniquely able to produce and process semiconductor materials, design and manufacture complex devices, and combine these devices into multifunction components.

We are a leader in the industry in offering dual use technologies that allow us to participate successfully in both commercial and aerospace and defense markets. We have unique technologies and capabilities to offer innovative design solutions including:

- GaAs, AlGaAs, InGaAs, InP, Si LDMOS, and SiGe IC products
- Unique MMIC processes: HMIC™ and GMIC™
- In-house design, fabrication, assembly, and screening capabilities
- Multiple facilities for improved flexibility and local content manufacturing
- Wide spectrum coverage from RF to millimeter wave frequencies
- One of the broadest selection of standard and custom products in the industry

### Commercial, Industrial and Military Products

This guide features our standard commercial products. We also provide custom products to meet your specific requirements. If you cannot find a product that meets your requirements in this guide, please contact us and we will work together to develop or recommend an appropriate solution.

For applications that involve more difficult requirements and critical schedules, we offer a dedicated product management team. Our staff of senior product managers is available to support all product and critical management needs and to offer the experience and attention to detail that ensures success.

### Our Quality Policy

The goal of M/A-COM Technology Solutions is to continually deliver effective, high quality products and services that meet our customers' and internal operations' needs in terms of delivery, performance, safety and value.

Process controls shall be implemented such that the tasks are performed properly the first time, so that products and services meet established, agreed-to requirements.

It is the personal responsibility of every employee to ensure quality, customer satisfaction, continual improvement, maintenance of our quality management system and compliance with customer and regulatory requirements.

### Operational Excellence

M/A-COM Technology Solutions operations are certified to ISO 9001, AS 9100, and QS-9000. Everyone is involved in the continuous improvement effort from suppliers to customers. Best practices are identified and implemented throughout the company, with a continuing challenge to identify opportunities for innovation and improvement.

### How to Purchase

Most of the standard products listed in this selection guide are available directly from the distribution partners found on our web site at [www.macomtech.com](http://www.macomtech.com) (Click on the How to Purchase our Products tab.) In addition, your local M/A-COM Tech sales office or nearest representative can assist you with ordering or service.

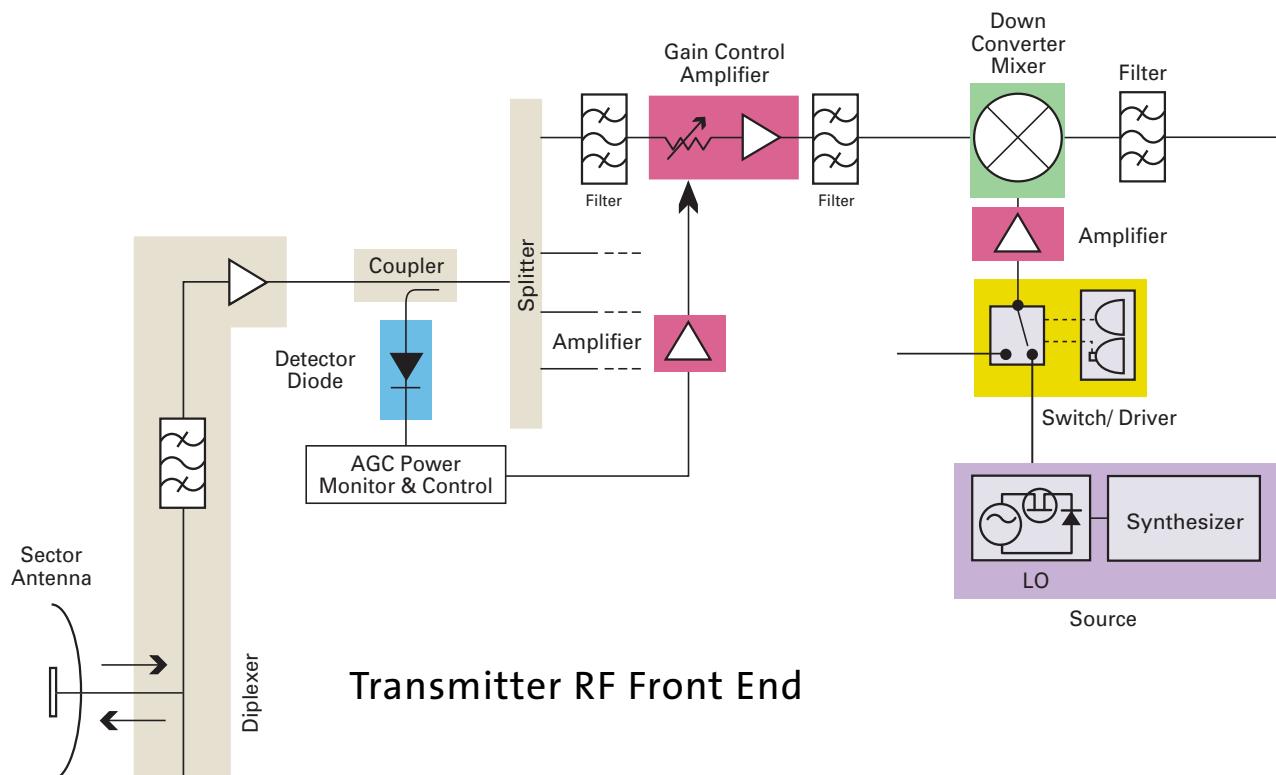

**M/A-COM Technology Solutions produces custom products and modifications to standard products. Please contact us with your specifications if you cannot find a standard product that meets your needs. Most of our standard products can be up-screened to applications or we can design custom parts to your specific requirements.**

**See the back cover of this catalog for contact information to request any of these items.**

# Amplifiers

M/A-COM Technology Solutions amplifiers are used extensively in commercial and military electronics applications. We produce low noise amplifiers (LNA), power amplifiers (PA), driver amplifiers and wideband amplifiers ranging from 50 MHz to 77 GHz. Our products are your ideal choice for voice and data applications for the consumer and military markets.

## Attenuators

M/A-COM Technology Solutions attenuators are used in various applications for automotive and wireless markets. We offer serial and parallel logic controlled digital attenuators and voltage variable analog attenuators (VVAs) that range from DC to 6 GHz.

- Cellular infrastructure
- Handset gain control
- Radar systems
- Satellite radios
- Test equipment

## RF and Microwave Diodes: PIN, Schottky, and Varactor Devices

M/A-COM Technology Solutions produces one of the widest variety of PIN, Schottky, and varactor diodes in the industry for microwave circuit applications from 1 MHz to 80 GHz. Diodes are manufactured in die form, plastic, ceramic, and metal packaging.

- Broadband and high power switch circuits: silicon and GaAs PIN switch diodes
- Analog attenuator circuits: silicon PIN attenuator diodes
- High power limiter circuits: silicon PIN limiter diodes
- Detector and mixer circuits: GaAs and silicon Schottky diodes
- Multiplier circuits: GaAs and silicon Schottky diodes
- Filter and VCO circuits: GaAs and silicon varactor diodes

## Limiter Diodes

- Die series for chip and wire high frequency microwave applications
- Ceramic packaged series for waveguide, coaxial and surface mount applications

## Multiplier Diodes

- Flip chip series for higher frequency millimeter wave applications
- Plastic packaged series for microwave frequency surface mount applications
- Ceramic packaged series for high power waveguide and coaxial applications

## Mixer and Detector Diodes

- Surmount™ chipscale style diodes for surface mount high performance applications
- GaAs flip chip and GaAs beam lead series for surface mount millimeter frequency applications
- Plastic series for cost effective, surface mount applications
- Ceramic series for microwave frequency surface mount applications

## Switch and Attenuator PIN Diodes

- CERMACHIP® series for microwave frequency applications
- Plastic series for cost effective, surface mount applications.
- \* AlGaAs series for low loss, high isolation millimeter frequency applications
- GaAs and silicon flip chip series for surface mount millimeter applications
- Surmount chipscale style diodes for surface mount high performance applications
- HIPAX series for high average power surface mount UHF applications
- Kilovolt series for high peak voltage HF and VHF applications
- HIPAX non-magnetic series for high average power MRI HF and VHF applications

## Tuning Diodes

- GaAs constant gamma series for higher frequency and high Q applications
- Plastic packaged silicon varactor diodes for surface mount applications, including VCOs, tunable filters, and phase shifters

M/A-COM Technology Solutions drivers are used extensively in wireless infrastructure base stations as well as military and defense applications. Drivers are typically used to translate TTL control voltages for attenuators and switches.

- Cordless and mobile phones
- Cellular base stations/wireless infrastructure
- Satellite radio
- GPS and DAB
- 2.4 GHz and 5.0 GHz WLAN
- VSAT
- CATV and broadband
- Bluetooth
- Fixed Wireless Access (FWA)
- Instrumentation
- Commercial and military radar
- Radar systems
- Test equipment

## Frequency Doublers

M/A-COM Technology Solutions frequency doublers are a specialized class of broadband mixers. They are used in a variety of communications applications.

- Surface mount, connectorized and drop-in packaging available for standard components
- Multi-octave input frequency coverage in the range of 5 MHz-12 GHz high performance applications

M/A-COM Technology Solutions offers a complete line of RF and Microwave limiters, limiting amplifiers and LNA/limiters up to 18 GHz. Our limiters and limiting amplifiers use the latest thin-film hybrid manufacturing techniques to obtain the highest levels of performance, repeatability, reliability and cost-effectiveness. These products use the latest technology available in the industry for silicon and GaAs MMICs, silicon bipolar, and GaAs FET devices.

## Modulators and Mixers

M/A-COM Technology Solutions modulators and mixers are widely used in aerospace and defense, wireless and broadband communications applications. We offer a variety of connectorized, flat pack, drop-in and surface mount packages with a broad range of operating frequency ranges and performance specifications for these markets.

### Modulators

- I/Q mod/demod versions available
- Products available in subsets of the 9 – 960 MHz frequency range
- Surface mount packaging for maximum performance

### Mixers

- Double and triple balanced designs
- Variety of technologies
  - Hybrid assemblies using Schottky quad diodes
  - GaAs pHEMT
  - Si HMIC
- Products available in subsets of the frequency range
  - RF/LO: 50 KHz – 24 GHz
  - IF: DC – 8 GHz

## Transformers

M/A-COM Technology Solutions offers many standard transformers used for a variety of wireless, wireline and aerospace and defense (A&D) communications applications.

- Available in a variety of surface mount, flat pack and connectorized packages
- Standard impedance ratios up to 4:1
- Balanced/unbalanced versions available
- 50W and 75W nominal impedance devices available

## MNS Microwave Chip Capacitors

- Suitable for DC blocking and RF bias networks in a variety of control and filter circuits
- Capacitance-temperature coefficient provides < 200 ppm/C
- Insertion loss < 0.1 dB at 15 GHz
- Ideal for chip and wire/ribbon microwave high performance circuits

## Inductors

We offer a line of high Q toroidal inductors useful for any application requiring RF or electromagnetic suppression.

- Standard devices are in the 53 to 273 nH inductance range
- Q of 90 minimum
- Surface mount wire wound toroid construction

## Splitters/Combiners

Splitters and combiners are used in a wide range of A&D, wireless and wireline communications applications. We offer a variety of connectorized and surface mount packages for these markets.

- 50 ohm and 75 ohm devices
- Products available in subsets of 400 KHz to 26 GHz frequency range
- 2, 3, 4, 5, 6 and 8 channel versions available

## Circulators/Isolators

M/A-COM Tech's circulators and isolators are used in a variety of wireless and defense applications.

- Single and dual junction devices
- Surface mount and drop-in packaging available for standard components

## Couplers

Couplers are used extensively in a wide range of A&D, wireless and wireline communications applications. We offer a variety of connectorized and surface mount packages with a broad range of coupling values for these markets.

## Hybrid Couplers

- Magic Tee (1800) and Quadrature (900) configurations
- Products available in subsets of the 2-3000 MHz frequency range
- Available as TO-cans, flatpacks, surface mount and connectorized

## Directional Couplers

- Coupling values of 6-30 dB
- Products available in subsets of the 2 MHz to 18 GHz frequency range
- 75W products available for CATV, DTV and DBS applications

## Filters/Diplexers

M/A-COM Tech offers a variety of highpass, lowpass and diplex filter components and assemblies used in common wireless communications standards and CATV, DBS and DTV applications.

- 50 ohms and 75 ohms diplexers
- Low cost surface mount packaging
- Multi-chip and MMIC products
- Higher functionality assemblies available

## Switches

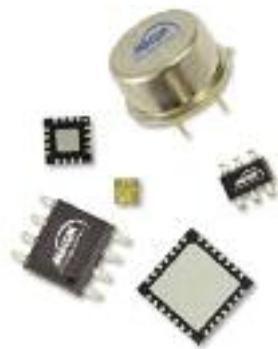

M/A-COM Technology Solutions IC-based switches are used extensively in commercial and military electronics applications. The switches range from DC to 20 GHz and are designed specifically for voice and data applications.

- Cordless and mobile phones
- Cellular base stations
- Satellite radio
- GPS & DAB
- 2.4 GHz and 5.0 GHz WLAN
- VSAT
- CATV and broadband
- Bluetooth
- RFID
- Fixed Wireless Access (FWA)
- Instrumentation
- Commercial and military radar
- Aerospace and defense products

M/A-COM Technology Solutions diode-based HMIC silicon series-shunt PIN diode switches provide outstanding frequency performance from 50 MHz to 20 GHz. Our AlGaAs series-shunt PIN diode switches provide remarkable frequency performance from 50 MHz to 50 GHz.

- HMIC™ and AlGaAs switches are suitable for microwave and millimeter wave control circuits for military, instrumentation, and optoelectronic applications.
- HMIC switches: 0.9 dB loss and 42 dB isolation at 20 GHz
- AlGaAs switches: 0.7 dB loss and 35 dB isolation at 50 GHz

### M/A-COM Technology Solutions

manufactures a broad range of RF power solutions using a variety of **transistor** technologies for commercial and military applications.

- Avionics
  - Broadcast
  - Communications
  - Industrial, scientific and medical
  - Radar

M/A-COM Technology Solutions high frequency Voltage Controlled Oscillators (VCOs) are intended for the stringent phase noise requirements of high data rate point-to-point radio applications. These InGaP HBT based VCOs do not require any external matching components. They are easily integrated into a phase lock loop using the divide-by-two output.

- Low power consumption
- Bandwidths greater than 10%
- RoHs compliant package with lead-free finish
- Compatible with a 260°C reflow temperature
- Low lead inductance package and excellent thermal path

We also offer a variety of VCOs for other wireless communications, CATV and broadband, private and land mobile radio, and long range radio modems

### Wavelength and Frequency

For all forms of wave, the velocity, wavelength, and frequency are related such that

$$\lambda F \sqrt{\epsilon_r \mu_r} = c$$

$\lambda$  = wavelength in meters (m)

$F$  = frequency in hertz (Hz)

$\epsilon_r$  = relative dielectric constant of propagation medium

$c$  = velocity of light (300,000,000 m/s)

$\mu_r$  = relative permeability of propagation medium

The dielectric ( $\epsilon$ ) is a property of the medium in which the wave propagates. The value of  $\epsilon$  is defined as 1.000 for a perfect vacuum, and very nearly 1.0 for dry air (typically 1.006). In most practical applications, the value of  $\epsilon$  in dry air is taken to be 1.000. For mediums other than air or vacuum, however, the velocity of propagation is slower, and the value of  $\epsilon$  relative to a vacuum is higher. Teflon®, for example, can be made with dielectric constant values ( $\epsilon$ ) from about 2 to 11.

### Frequency vs. Wavelength

## Search by Part Number

Fill in as much of any part number as you know. The Search function will make suggestions until you find exactly what you want.

## Search Site

Looking for a data sheet, application note or most anything else? Type in a few key words and Google will search our site for you.

## Search by Product

Drop down menus show you part types within product categories. Filters make finding the correct part quick and easy.

## Quick Links

Click on any bar and go right to the form or page you need. It couldn't be easier.

## Product Selection Guide

Click here for the electronic version of our popular printed Guide.

## Search by Market

Click on any title and go directly to a page dedicated to that market. Then click on a product type and you'll be directed to a search page with filters. This makes it so easy to quickly find what you need.

## Frequency Guide by Application

Click here for a handy pop-up Guide that visually shows the frequency range for many applications.

## The Press Box

Quick links to our latest news. Stay on top of press releases and other hot-off-the-press items.

## Contact Us

Have a question? We've got answers. Click here for a form that will be directed to a Customer Support person.
