## Model 1220 1 psi

- PC Board Mountable Pressure Sensor
- 0-50 mV Output
- Voltage Excitation
- Gage and Differential
- Temperature Compensated

## **DESCRIPTION**

The Model 1220 is a temperature compensated, piezoresistive silicon pressure sensor packaged in a dual-in-line configuration and intended for cost sensitive applications where excellent performance and long-term stability are required.

When using the 1220 with a fixed voltage reference and current set resistor as shown in the application schematic, a span of 50mV and 1% interchangeability can be achieved. Integral temperature compensation is provided over a range of 0-50°C using laser-trimmed resistors.

Please refer to the 1220 standard datasheet for information on products with operating pressures greater than 1psi. For current excitation, please refer to the Model 1210.

## **FEATURES**

- Dual-in-Line Package
- 0°C to 50°C Compensated Temperature Range
- ±0.3% Non Linearity
- 1.0% Interchangeable Span (provided by current set resistor)
- Solid State Reliability

## **APPLICATIONS**

- Medical Instruments
- Airspeed Measurement
- Process Control
- Factory Automation
- Leak Detection

#### Notes

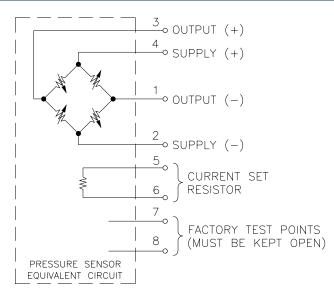

- 1. Refer to application schematic.
- 2. Best fit straight line.
- 3. Maximum temperature error between 0°C and 50°C with respect to 25°C.
- 4. For a zero-to-full scale pressure step change.
- 5. Long term stability over a one year period with constant voltage and temperature.
