

SA40072 ñ 4 to 20mA Signal Conditioner

The SA40072 is a single channel signal conditioner, which provides a 4 to 20mA output. With the ability to interface directly with the complete line of Spectron single axis electrolytic tilt sensors (not included), the SA40072 is the perfect solution for narrow or wide angle measurements. The open architecture design is ideal for space restrictive / OEM applications, while the 4-20mA output can be easily interfaced to most industrial /process industry controllers. The sensor is remotely mounted from the electronics, thereby providing maximum installation flexibility.
